

ments of gold the Banks steadily maintain their specie. The falling off in the line of loans, is considered a favorable indication, and as giving promise of a maintenance of the state quo. However, as the receipts of gold from California will not probably be large for the next two or three steamer weeks, and the drain for Europe will continue, we can scarcely expect the specie in Bank to remain at the present point. The comparative figures of the state are:

	Loans and Dis-	Circulation,	Deposits
March 10.	\$2,922,225	\$1,211,996	\$75,299,493
March 17.	\$2,947,545	16,853,932	7,061,118
			76,514,270

Inc. \$11,516 Specie. Inc. \$63,265 Dec. \$79,999 Inc. \$26,739

The loans are now apparently within two millions as high as they were at this time last year, but they are in fact within a few hundred thousand dollars as large, as the above figures do not include the statements of the Central, Empire City, Knickerbocker, Suffolk and Eighth-av. Banks, which were then included. The specie line, however, is some six millions greater than at that time. We are glad to see that the Banks adhere to the conservative policy of the last two weeks, and trust they will not be driven from it by a desire for large dividends.

Comparative Table of Loans, Specie, Circulation and Deposits of the Banks of the City of New York, for the weeks ended Saturday, March 10, 1855, and Saturday, March 17, 1855, to which is affixed the Capital of each Bank at the latter date.

BANKS OF BANKS	March 10.	March 17.	Average amount of Capital, Loans & Discounts, etc., of Banks at 17.
